

Full Stack Software Engineer-Python

Key Responsibilities:

- Design, develop, and maintain microservices architecture using Docker containers.
- Implement and optimize Docker networking solutions for inter-container communication.
- Build and maintain web scraping and automation tools using Selenium.
- Develop robust bot systems for data collection and processing.
- Implement email monitoring systems using pub-sub messaging patterns.
- Create high-performance APIs using FastAPI.
- Maintain and enhance existing Django applications.
- Collaborate with cross-functional teams to deliver scalable solutions.
- Optimize application performance and troubleshoot complex technical issues.

Required Technical Skills:

- Containerization & Microservices
- Docker Advanced proficiency in containerization, Docker Compose, and orchestration.
- Docker Networking Deep understanding of container communication, bridges, and service discovery.
- Microservices Experience in designing and implementing distributed systems.
- Selenium Proven experience with automated browsers and scraping solutions.
- Bot Development Creating and maintaining automation bots.
- Data Extraction Handling dynamic content and anti-bot measures.
- Pub-Sub Systems Implementing publisher-subscriber patterns for email monitoring.
- Message Queues Understanding asynchronous messaging systems.
- Python Frameworks, FastAPI Proficiency in building modern APIs.
- Django: Solid experience with web application development.
- Strong Python programming skills for backend development.

Qualifications

- **Minimum 3+ years** of proven industry experience in backend/full stack development.
- Bachelor's degree in Computer Science, Engineering, or related field (or equivalent experience). And **strong communication skills**.
- Strong understanding of RESTful API design principles.
- Experience with database design and optimization (SQL/NoSQL).
- Knowledge of version control systems (Git).
- Understanding of CI/CD pipelines and DevOps practices.

Compensation & Benefits

Salary: 200k to 300k

Additional Perks: Dinner provided (shift timings: 4 PM – 1 AM)

Office location: DHA Phase 6
